ABOUT US

Classic Engineering has been established in the year 2000 & so far successfully designed & manufactured number of precision moulds & 'Hot Runner Moulds' of high productivity & high cavitation up to 96 for various applications such as battery tops, Soap Dispenser, Switch Gear, Electronics, Home Appliances, Medical, Writing Instruments, Caps & Closures for pharma, cosmetics and health care segments and paint containers from 1kg to 20ltrs.

With highly qualified people and years of tool room experiences, Classic Engineering has a proven track record of converting customers needs into superior end products in time. It has been catering to a wide customer base, domestic and international competing mould manufacturers of developed countries.

We are a quality cautious plastic injection & Blow mould manufacturer with an expertise in design, engineering & mould construction with an additional advantage of having knowledge in Plastic Processing. We build moulds ranging from a prototype single cavity moulds to a large complex, multi cavity, hot runner moulds with special emphasis in short lead times, high quality & cost effective moulds.

FACILITIES

We have fully equipped in house tooling facility using CAD/CAM to design & construct moulds. Our Tool Room is equipped with latest state of the art machinery, which are integrated with our CAD/CAM facilities through LAN, which provides a seamless integrated environment for a full proof mould development.

PRODUCTS

Classic Engineering has expertise in making moulds for a variety of industry ranging from Paint Manufacturers, Torch Light & Dry Cell Battery, Caps & Closures for packing Industry, Soap Dispensers, House Hold, Electrical Switch Gear etc.
